

heartbeat medical

The key to unlocking
Value-based Healthcare

heartbeat

Heartbeat enables hospitals and clinicians to capture and analyze patient reported outcomes...

- **Effortless PROM collection** in clinical care settings for hospitals
- **Proven standard** sets to track outcomes for all major diseases
- **Tailored** to doctors and patients
- **Seamless** HIS integration via HL7
- **GDPR** compliant SaaS offering to hospitals departments

...and is trusted by Germany's most renowned healthcare institutions
and over 80.000 patients so far.

Dear Patient,

We would like to know how you are doing at the moment. For that purpose we would like to ask you to answer some questions regarding your health.

This digital questionnaire does not replace medical consultation, but helps us to evaluate your state of health even better and observe it over a long-term period. This way we can constantly improve our treatment for you and other future patients!
